

GDF Suez Leeds

New Head Office Building

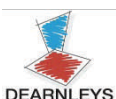

Astralux Screen Roller Blinds

Project		Solution	
<p>The client took the top two floors of this new building in Leeds.</p> <p>It was identified that the height and exposed nature of the site meant that sun angles and glare was going to pose a problem with computer screens.</p> <p>There was also a requirement for the blinds to help reduce solar gain in the summer. Also at this site there was a specific requirement for a branded blind across the length of one wall.</p>		<p>Dearnleys proposed the Astralux 3000 roller blind system with manual side chain operation. The blinds were fitted with a screen fabric with a 1% openness.</p> <p>For the branded blind Dearnleys proposed a Silent Gliss 2700 Panel Blind with the panels screen printed to the client's exact requirements. The blind was manually operated and the panels can be drawn when required.</p>	
Benefits		Details	
<ul style="list-style-type: none"> • Effective control of glare but some view through the fabric maintained • Simple and accurate operation by side chain mechanism • Effective reduction of solar gain • Robust, low maintenance solutions 		<p>Products:</p> <p>Astralux 3000 roller blinds (208 nbr) fitted with 1% screen fabric</p> <p>Silent Gliss Panel Blinds - with bespoke screen printing to fabric panels</p>	<p>Architect: Harmsen</p> <p>Contractor: Styles & Wood</p>
