

# Peterborough Arena Cambridgeshire

Rooflight blinds fully open

Rooflight blinds fully closed

Project	Solution	
<p>Peterborough Arena is a leading exhibition and events space located at the East of England Showground in Cambridgeshire.</p> <p>This multi-use facility enjoys natural lighting from a very large elliptical rooflight but the levels of light needed to be controlled.</p> <p>In addition room darkening blinds were required to a number of windows in the building along with electric curtain tracks and curtains.</p> <p>Dearnleys supplied and installed all products.</p>	<p>Dearnleys used the Astralux <a href="#">6000</a> motorised louvre blind system for the main rooflight. These blinds can be shaped to fit the glazing and can span very large areas. As the slats can be tilted it is possible to finely control the amount of light ingress.</p> <p>Astralux <a href="#">4000</a> room darkening blinds were fitted to the vertical glazing.</p> <p>Electric curtain tracks with FR blackout curtains were also installed and operated by radio control.</p>	
Benefits	Details	
<ul style="list-style-type: none"> <li>• Effective light and glare control</li> <li>• Simple and quick to operate</li> <li>• Full room darkening capabilities with roller blinds</li> <li>• Motorised control from over 200m with radio handset</li> <li>• Robust and durable solutions</li> </ul>	<p>Products:</p>	<p>Astralux <a href="#">6000</a> roof louvre systems with motorisation and remote control operation.</p> <p>Astralux <a href="#">4000</a> room darkening blind systems with manual operation and FR fabric.</p> <p>Astralux electric <a href="#">curtain tracks</a> with radio control and fitted with FR blackout curtains.</p>
