

Royal Hallamshire Hospital Sheffield

Louvre Roof Blinds Closed

Louvre Roof Blinds Open

Project		Solution	
<p>This project involved the refurbishment of two floors at this large teaching hospital in Sheffield.</p> <p>There was a requirement to reduce heat and light gain to external windows and also the sloping, glazed roof to a cafe area.</p> <p>All products needed to have a proven heritage within high use medical environments.</p>		<p>For the external windows Dearnleys installed silver reflective window film to help control heat and excessive glare.</p> <p>In addition, to provide total light control, Astralux vertical blinds with FR black-out fabric were also installed to external windows.</p> <p>For the sloping roof glazing in the cafe area Dearnleys installed the Astralux 6000 roof blind system with gearbox operation. The slats can be easily adjusted to control the amount of light ingress.</p>	
Benefits		Details	
<ul style="list-style-type: none"> • Effective control glare with window film and blinds • Simple and accurate operation of all blinds by side chain mechanism or gearbox operation • Effective reduction of solar gains • Robust, low maintenance solutions 		<p>Products:</p> <p>Astralux 1000 vertical blinds</p> <p>Astralux 6000 louvre roof blind system</p> <p>Solar control window film</p> <p>Architect:</p> <p>Bond Bryan Architects</p> <p>Contractor:</p> <p>Henry Boot</p>
