

St James Hospital Leeds

Europe's Largest Oncology Unit

The Challenge		The Solution	
<p>This new Oncology Unit is the largest of its kind in Europe covering over 66,000m² with 350 bed spaces. A project of this scale required detailed project management from Dearnleys. All bed spaces needed a proven cubicle track system and windows needed shading with a durable and simple blind system.</p> <p>With heightened awareness of hospital acquired infections Dearnleys were required to provide anti-microbial finishes on soft fabrics. Black-out blinds also required for light sensitive areas.</p>		<p>Silent Gliss cubicle track system was supplied and installed using hanger rods fixed back to the slab for a solid fix.</p> <p>All curtains were supplied with a BioCote finish to help with infection control and spare curtains were also supplied to assist with regular cleaning.</p> <p>Solar and glare control was achieved via vertical blinds with mono control operation. To ensure light exclusion in sensitive areas framed dim-out blinds were installed.</p> <p>The installation was completed over a eight month period to meet project plans.</p>	
The Benefits		The Details	
<ul style="list-style-type: none"> • Effective screening of all bed spaces • Enhanced infection control via anti-microbial finishes on soft fabrics • Control of glare and solar gain by window blinds • Effective dim-out solution where required • Low maintenance solutions 		<p>Products:</p> <p>Architect:</p> <p>Contractor:</p>	<p>Silent Gliss 6100 cubicle track system and curtains - 2,500 mtrs</p> <p>Silent Gliss 2810 system vertical blinds - 508 nbr</p> <p>Silent Gliss 4540 dim-out blind system - 30 nbr</p> <p>Silent Gliss 1200 hand drawn curtain track - 886 mtrs</p> <p>Anshen Dyer</p> <p>Bovis Lendlease</p>
