

St Paul's Place Sheffield

Awnings extended

Awnings retracted

Project		Solution	
<p>St Paul's Place enjoys a spectacular views over the renowned Peace Gardens and Millennium Square in Sheffield.</p> <p>The building is rated as BREEAM Excellent and the client required external shading to make maximum use of the roof terrace for tenants of the building.</p> <p>The requirements were that the shading should integrate with the building and be quick to deploy and retract.</p>		<p>Dearnleys supplied and installed Astralux 7000 awning system fitted to custom-made brackets.</p> <p>The awnings were supplied using a hardware colour which matched the louvres of the plant room and the fabric was matched similarly.</p> <p>The three awnings were individually motorised but operated as a group by radio controlled handset with a wind sensor to ensure they retracted if the wind speed exceeded their operational limits.</p>	
Benefits		Details	
<ul style="list-style-type: none"> • Effective shading • Simple and quick to operate • Anemometer to protect awnings and fixings • Colour matched hardware and fabric to building • Robust and durable solution 		<p>Products:</p> <p>Astralux 7000 External Awning System</p> <p>3 nbr motorised with radio control operation.</p> <p>Wind sensor override protection</p> <p>Contractor:</p> <p>Bowmer & Kirkland</p>
