

West Yorkshire Police SSU, Wakefield

Full height glazing to reception area

Screen roller blinds fully deployed

Project		Solution	
<p>Dearnleys completed the installation of a large quantity of Astralux 3000 roller blinds to the offices and laboratories of the Police Scientific Support Unit.</p> <p>A year later Dearnleys were asked to provide their expertise to reduce the heat and light gain caused by the unshaded full height glazing in the reception area of this building.</p> <p>With no local power feeds any solution had to be manually operated.</p>		<p>Dearnleys proposed the same Astralux 3000 roller blind system that was installed to the rest of the building. Such is the versatility of this system it can be used for most glazing sizes.</p> <p>The same flame retardant screen fabric was also used as this provided the correct degree of glare control and significantly reduced heat gain.</p> <p>Dearnleys installation experts used a scissor lift with an extendable platform to provide safe access.</p>	
Benefits		Details	
<ul style="list-style-type: none"> • Effective control of heat and glare to provide a comfortable working environment for staff • Extremely robust and durable fabric suitable for large blinds • Blinds matched other in building providing an elevational consistency • Low maintenance solution 		<p>Products:</p> <p>Architect:</p> <p>Contractor:</p>	<p>Astralux 3000 roller blind system.</p> <p>Fitted with screen fabric. Manual operation.</p> <p>West Yorkshire Police</p>
