

# Jarrow Community Hub

**External Facade**

**Blinds to the Gym**

## Project

The project was the complete refurbishment of South Tyneside Community Hub in Jarrow to create a multi purpose leisure facility incorporating a new library.

The client wanted a functional and durable solution to solar shading and this included the option to control each individual pane of glass through the same handset

## Solution

Dearnleys were asked to provide a solution to shade the high level windows within the gym, library, dance studio and Customer service areas.

Dearnleys supplied and installed Astralux 3000 motorised roller blinds and chain operated roller blinds to this site.

The blinds were fitted with a 50mm gap from the glazing to prevent any thermal shock to the glass and the motorised versions were operated by radio controlled handsets.

## Benefits

- Effective heat and glare control
- Simple and quick to operate
- Motorised control from over 200m with radio handset
- Robust and durable solution

## Details

Products:	Astralux 3000E Motorised operation Remote Control Handsets
Architect:	Gradon Architecture
Contractor:	Engie
Client:	South Tyneside School
