

Kepier School, Houghton le Spring

Front Elevation

'Screen' blinds to classroom

Project

The client wanted a functional and durable solution to the solar shading to work in conjunction with the ventilation system which used part of the window opening

Solution

2 A3000 blinds were fitted to each window opening working around the ventilation system.

Also installed were A4095 motorised roof light blinds along with framed room darkening blinds for the science labs.

Benefits

- Effective control of glare and solar gain
- Simple and quick to operate
- Motorised control via radio remote control handsets
- Robust and durable solution
